SEMICON Europa 2021: Advanced materials and solutions by Kyocera

The fine ceramics specialist Kyocera will participate in this year's SEMICON Europa 2021 in Munich, Germany. As Europe's largest trade fair focusing on electronics manufacturing, it will take place from 16 to 19 November.

Kyoto/London, 19th October 2021 This November, the Japanese technology company Kyocera will participate in SEMICON Europe 2021 trade fair and present various solutions and fine ceramic materials used in the field of electronics manufacturing.

Since its foundation in 1959, Kyocera has supplied components for a wide range of markets. Through continuous research and development based on fine ceramics, the company supports industrial equipment, communication devices, medical equipment and renewable energy equipment, among others. Kyocera offers over 200 different formulations and compositions of ceramics such as aluminium oxide, aluminium nitride, cermet, forsterite, mullite, sapphire, silicon carbides, silicon nitride, aluminium titanate, yttrium oxide and zirconium oxide. Kyocera's wide range of technologies in the field of process technology; include dry pressing technology, cold and hot isostatic pressing, injection moulding, foil casting and metallization of ceramics. These technologies will be showcased at the trade fair in Munich in hall B1 at booth number B1830.

Kyocera has global, fully vertically integrated, facilities to manufacture fine ceramic components in Japan, USA and Europe for almost all semiconductor equipment related applications. Most recently, two production sites have also been acquired in Germany. By utilizing its extensive competence, Kyocera is offering a broad variety of products ranging from large-scaled frame components in equipment structures of lithography and metrology machines, various plasma resistant components used in the harsh environments of etching and deposition, as well as numerous other functionally and dimensionally precise components which are either touching or handling wafers in the semiconductor related manufacturing process. With its global footprint, Kyocera is able to respond quickly and collaboratively to clients locally and satisfy the growing market demand for fine ceramic components in this industry's supply chain.

About Kyocera

Headquartered in Kyoto, Japan, KYOCERA Corporation is one of the world's leading manufacturers of fine ceramic components for the technology industry. The strategically important divisions in the KYOCERA Group, which is comprised of 297 subsidiaries (as of March 31, 2021), are information and communications technologies, products which increase quality of life, and environmentally friendly products. The technology group is also one of the most experienced producers of smart energy systems worldwide, with more than 40 years of know-how in the industry. The company is ranked #549 on Forbes magazine's 2020 "Global 2000" listing of the world's largest publicly traded companies.

With a global workforce of over 78,000 employees, Kyocera posted sales revenue of approximately €11,74 billion in fiscal year 2020/2021. The products marketed by the company in Europe include printers, digital copying systems, semiconductor-, fine ceramic-, automotive- and electronic components as well as printing devices and ceramic kitchen products. The KYOCERA Group has two independent companies in the United Kingdom: KYOCERA Fineceramics Ltd. and KYOCERA Document Solutions Ltd.

The company also takes an active interest in cultural affairs. The Kyoto Prize, a prominent international award, is presented each year by the Inamori Foundation — established by Kyocera founder Dr. Kazuo Inamori — to individuals worldwide who have contributed significantly to the scientific, cultural, and spiritual betterment of humankind (approximately €763,000* per prize category).

*Date of Survey: June 18th, 2021
